Elliot Shohet

Full-stack Engineer

Los Angeles, CA | elliot.shohet@gmail.com | (818) 445-2786 | elliotshohet.com | elliotshohet | elliotshohet

Profile

Full-stack Engineer taking 0→1 web, mobile, and desktop products from idea to production. Owns architecture and releases across interfaces, APIs, and data; has led small engineering teams. Builds practical AI coaching and agent workflows with a focus on reliable, efficient model usage.

Experience

Burn | Full-stack Engineer — Oct 2022 – Present

- Built React Native/Expo and Next.js health workflows for meals, exercise, weight, and analytics on shared TypeScript services and PostgreSQL/Prisma records.
- Implemented streaming AI coaching with saved conversation history, shared data tools, and durable retry safeguards against duplicate or interrupted record changes.
- Exposed account-scoped Burn data and AI actions through OAuth-protected MCP for ChatGPT, with explicit write/history consent and revocation; integrated Google Health data.
- Unified web and mobile authentication with Better Auth; built native Google sign-in and server-side Apple App Store and Google Play subscription verification.

Nifty's | Full-stack Engineer — May 2021 – Oct 2022

- Engineered Solidity smart contracts supporting 100,000+ NFT mints across Ethereum and Palm.
- Automated smart-contract deployment and verification with TypeScript and CI/CD, making Ethereum and Palm releases repeatable across staging and production.

Hypernet Labs | Full-stack Engineer — Feb 2019 – Feb 2020

- Architected layer-two ERC20 payment settlement infrastructure reaching 25 transactions per second.
- Built a modular developer SDK with dependency injection and introduced CI/CD automation for repeatable delivery.
- Managed a small engineering team and technical roadmaps while contributing architecture and implementation.

i2Chain, Inc. | Full-stack Engineer — Sep 2018 – Feb 2019

- Built Electron/React/Redux desktop software and Node.js identity-based access controls; developed AWS Lambda services and operated a production geth node cluster.

Skills

AI: OpenAI, LLMs, AI SDK, Codex, Agent harnesses, Tool calling, MCP, AI evaluations

Languages: TypeScript, JavaScript, Python, Swift, Kotlin, SQL, Shell scripting, Solidity

Backend: Node.js, REST APIs, WebSockets, OAuth, Bun, Better Auth, Zod, Sharp, Express, Ethereum, Web3.js

Frontend: React, Next.js, React Native, Expo, Tailwind CSS, shadcn/ui, Electron, Three.js, React Three Fiber, Redux, React Router, jQuery

Data: PostgreSQL, Prisma, Supabase, Redis, NoSQL, Drizzle ORM, SQLite, IPFS

DevOps: Docker, Docker Compose, Linux, CI/CD, GitHub Actions, Git, Vercel, Vercel Sandbox, Vercel Workflow, Expo EAS, AWS Lambda, Amazon EC2, AWS Elastic Beanstalk, Chef, Webpack

Testing: End-to-end testing, Playwright, Jest, Mocha, Chai, Vitest, Node.js test runner, Bun test, Python unittest, Truffle, Ganache

Projects

Freecoda · **GitHub**

Built an open-source AI agent for conversations and project work, with a shared TypeScript core, Electron desktop app, Next.js service, and terminal CLI. Implemented workspace-scoped file tools, separate edit and command approvals, and encrypted conversation sync across clients. Built transactional PostgreSQL usage reservations and settlement to enforce user allowances and a global spending cap.

Education

University of California, Davis, BS in Computer Science — 2012 – 2017
