PROFILE

Senior fullstack engineer and founding engineer building web, mobile, and desktop products from concept to launch. Owns interfaces, backend services, databases, cloud infrastructure, and AI integrations in startup environments.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Python, Solidity

Web, mobile and desktop: React, Next.js, React Native, Expo, Electron, Tailwind CSS

Backend and data: Node.js, PostgreSQL, Prisma, Supabase, Redis, REST APIs, WebSockets, Zod

AI: OpenAI API, multimodal analysis, streaming chat, tool calling, MCP

Cloud and delivery: Vercel, AWS (Lambda, EC2), Google Health APIs, Docker Compose, Expo EAS

Engineering: System design, OAuth, store billing, image optimization (Sharp), regression testing, Git, Bun

PROFESSIONAL EXPERIENCE

Burn | Founding Engineer Oct 2022 - Present

- Built a React Native/Expo health app, Next.js dashboard, and PostgreSQL/Prisma backend in a shared TypeScript monorepo; added native Google sign-in bridges in Swift and Kotlin.
- Built streaming AI chat with persistent history and data-management tools; added transactional leases, retry-safe action tracking, rate limits, and model usage/cost reporting.
- Integrated Google Health and OAuth-protected MCP tools for ChatGPT, with scoped consent, encrypted tokens, concurrent metric fetching, and partial-failure handling.
- Evolved RevenueCat billing into direct Apple/Google purchase verification. Optimized meal images with Sharp resizing/compression and upload limits; added Docker workflows and regression checks.

Nifty's | Founding Engineer May 2021 - Oct 2022

- Engineered contracts for 100,000+ NFT mints and automated deployment and verification across Ethereum and Palm, with staging and mainnet environments for repeatable releases.

Hypernet Labs | Founding Engineer Feb 2019 - Feb 2020

- Architected settlement infrastructure scaling ERC20 payments to 25 transactions/second. Built a modular SDK with dependency injection and CI/CD automation; managed a small engineering team.

i2Chain, Inc | Founding Engineer Sep 2018 - Feb 2019

- Built Electron/React/Redux desktop software, Node.js identity-based access control, a production geth node cluster, and AWS Lambda services.

BlockchainForums.info | Blockchain Consultant Sep 2017 - Sep 2018

- Built Solidity settlement contracts handling hundreds of millions in value.

Ooma, Inc. | Software Engineering Intern Jun 2017 - Sep 2017

- Containerized applications with Docker Swarm and profiled a million-line Java codebase.

Weebly | Software Engineering Intern Jun 2015 - Sep 2015

- Generated API clients in 13 languages and implemented REST endpoints and automated checks.

ShrinkOnce Inc | Fullstack Software Engineer Jul 2012 - Jul 2014

- Built a Laravel product and reduced bandwidth costs by 99.03% through software design.

Greekdrop | CTO Dec 2012 - May 2014

- Built an ecommerce portal and automated inventory management and accounting workflows.

EDUCATION

University of California, Davis | B.S. Computer Science 2012 - 2017
