PROFILE

Full-stack engineer building AI products across mobile, web, and backend services. Combines hands-on TypeScript, React, Next.js, and PostgreSQL development with experience in LLM tool calling, payment infrastructure, and leading small engineering teams.

PROFESSIONAL EXPERIENCE

Burn Full-stack Engineer — Oct 2022 - Present

- Own full-stack engineering for a mobile and web health product using React Native/Expo, Next.js, and PostgreSQL/Prisma in a shared TypeScript codebase.
- Built streaming OpenAI coaching with LLM tool calling for meals, exercise, weight, and goals; used conversation locks and saved tool results to guard against overlapping replies and duplicate writes.
- Integrated Google Health data and exposed health tools to ChatGPT through an OAuth-protected MCP server with scoped access and encrypted tokens.
- Implemented native Google sign-in in Swift and Kotlin and direct App Store / Google Play subscription verification, checking purchase ownership, product, status, and environment.
- Standardized database migrations, web/mobile development, and Android builds with Docker Compose; added release preflight checks and regression coverage for authentication, billing, and coaching.

Nifty's Full-stack Engineer — May 2021 - Oct 2022

- Engineered Solidity smart contracts supporting 100,000+ NFT mints across Ethereum and Palm.
- Automated smart-contract deployment and verification with TypeScript and CI/CD, making Ethereum and Palm releases repeatable across staging and production.

Hypernet Labs Full-stack Engineer — Feb 2019 - Feb 2020

- Architected layer-two ERC20 payment settlement infrastructure reaching 25 transactions per second.
- Built a modular developer SDK with dependency injection and introduced CI/CD automation for repeatable delivery.
- Managed a small engineering team and technical roadmaps while contributing architecture and implementation.

i2Chain, Inc. Full-stack Engineer — Sep 2018 - Feb 2019

- Built Electron/React/Redux desktop software and Node.js identity-based access controls; developed AWS Lambda services and operated a production geth node cluster.

TECHNICAL SKILLS

Languages & UI	TypeScript, JavaScript, React, Next.js, React Native, Expo, Tailwind CSS, shadcn/ui, Python
Backend & APIs	Node.js, REST APIs, GraphQL, WebSockets, OAuth
Data	PostgreSQL, Prisma, Supabase, Redis, NoSQL
AI & integrations	OpenAI, Large language models (LLMs), Model Context Protocol (MCP)
Cloud	Vercel, AWS Lambda, Amazon EC2, Amazon S3, Amazon RDS, Google Cloud Platform (GCP), Google Cloud Storage
DevOps	Docker, Docker Compose, Linux, CI/CD, GitHub Actions
Testing	End-to-end testing, Playwright, Jest, Mocha, Chai

EDUCATION

University of California, Davis | B.S. Computer Science — 2012 - 2017
