Elliot Shohet

Full-stack Engineer

Los Angeles, CA | elliot.shohet@gmail.com | (818) 445-2786 | elliotshohet.com | elliotshohet | elliotshohet

Profile

Full-stack product engineer building AI applications and developer tools with TypeScript, React, Node.js, and PostgreSQL. Owns architecture, APIs, authentication, and production releases across web, mobile, and desktop. Built developer SDKs, LLM tool integrations, and payment infrastructure; led a small engineering team.

Experience

Burn | Full-stack Engineer — Oct 2022 – Present

- Built React Native/Expo mobile and React/Next.js web interfaces for meal, exercise, weight, and analytics workflows on shared TypeScript services and PostgreSQL/Prisma data models.
- Implemented streaming LLM coaching, persistent conversation history, and tool calling with retry safeguards against duplicate or interrupted data updates.
- Built OAuth-protected Model Context Protocol (MCP) integrations for ChatGPT, with account-scoped APIs, explicit user consent, and access revocation; integrated Google Health data.
- Unified web and mobile authentication with Better Auth; built native Google sign-in and server-side Apple App Store and Google Play subscription verification.
- Built Docker Compose development workflows, release checks, and automated regression tests for authorization, billing, health data, and AI coaching retries.

Nifty's | Full-stack Engineer — May 2021 – Oct 2022

- Engineered Solidity smart contracts supporting 100,000+ NFT mints across Ethereum and Palm.
- Automated smart-contract deployment and verification with TypeScript and CI/CD, making Ethereum and Palm releases repeatable across staging and production.

Hypernet Labs | Full-stack Engineer — Feb 2019 – Feb 2020

- Architected layer-two ERC20 payment settlement infrastructure reaching 25 transactions per second.
- Built a modular developer SDK with dependency injection and introduced CI/CD automation for repeatable delivery.
- Managed a small engineering team and technical roadmaps while contributing architecture and implementation.

i2Chain, Inc. | Full-stack Engineer — Sep 2018 – Feb 2019

- Built Electron/React/Redux desktop software and Node.js identity-based access controls; developed AWS Lambda services and operated a production geth node cluster.

Skills

Frontend: React, Next.js, CSS, Tailwind CSS, Redux, React Native, Electron, Three.js

Backend: Node.js, Express, REST APIs, WebSockets, OAuth

Data: PostgreSQL, MongoDB, Redis, SQL, NoSQL, Prisma

DevOps: Docker, CI/CD, GitHub Actions, AWS Lambda, Amazon EC2, Linux, Git, Vercel

Testing: End-to-end testing, Playwright, Jest, Vitest, Mocha, Chai

AI: Large language models (LLMs), OpenAI, AI SDK, Tool calling, Model Context Protocol (MCP), AI evaluations

Languages: TypeScript, JavaScript, Python, SQL, Solidity, Shell scripting

Projects

Freecoda · **GitHub**

Built an open-source AI agent for conversations and project work, with a shared TypeScript core, Electron desktop app, Next.js service, and terminal CLI. Implemented workspace-scoped file tools, separate edit and command approvals, and encrypted conversation sync across clients. Built transactional PostgreSQL usage reservations and settlement to enforce user allowances and a global spending cap.

Education

University of California, Davis, BS in Computer Science — 2012 – 2017
